Patient Spotlight

Meet Dawn & Trevor

Two weeks after finding out her son Trevor was cured of his aplastic anemia, Dawn discovered a lump in her right breast. Two days later, it was confirmed that it was breast cancer. Two months later she had a lumpectomy and treatment began. During chemotherapy treatment her numbers dropped so low, Dawn had to have blood transfusions to stabilize her numbers. After 16 weeks of chemo, 38 straight days of radiation and a couple of blood transfusions, she is now cancer free! Without the help of strangers donating blood, Dawn and her son Trevor would have had a much different outcome.

Bloodmobile Greeter Schedule—September 2017

The average time for blood drives is approximately five to six hours. To ensure that your time is respected, an optional time commitment is available: **four hour shift minimum**. Please indicate if you would like a four hour shift when signing up for blood drives. “**Procedures**” number listed following the blood drive time corresponds to the donor projection for that particular drive. Please note, the blood drive schedule is subject to change. **If you have already signed up for a drive in September, it will NOT be listed unless it needs more than one volunteer.** If anyone needs a list of what drives they signed up for and/or has any questions please give us a call Thank you!
